

Examiner's Amendment

1. The Examiner contacted Andrew Dillon, Attorney of record, to discuss making an amendment to claim 18. Mr. Dillon agreed to give Examiner authorization to amend claim 18.
2. 18. (currently amended) [Apparatus according to claim 16] A method according to claim 16 wherein data associated with one of said others of said plurality of data display areas is an encrypted data stream having a decryption key that differs from the decryption key associated with the encrypted data associated with the one of said plurality of data display areas.

Reasons for Allowance

3. According to board decision on 4/9/08, the board reversed Claims 13-22. Claims 13-22 were rejected by prior art of Pinder.
4. Claims 13-22 are allowable, because prior art does not disclose an "intelligent television" (or personal computer display) that has multiple display areas, wherein each display area has a decryption key. Pinder does not disclose encrypts just one of the plurality of display areas for decryption by a decryption key that relates only to the encrypted data stream associated with that data display area.
